# SP200 series PV Pump controller

## Product Features

### product description

SP200 series controller is a newly developed controller specialized for PV pump, it is mainly used for water supply in remote areas where without power supply or supply is unstable. PV pump controller can drive all kinds of water pumps by changing direct current which to be issued by PV module into alternating current. Systems continuously pump in good weather. For systems without batteries and other energy storage devices, it is recommended that the water should pump to the cistern for coming use.

SP200 PV Pump Controller adds MPPT algorithm to ensure the system run at the MPPT of solar modules in real-time.

### Features and Functions

1. SP200 PV Pump Controller continuously monitors the performance of the system and can detect a variety of anomalies.
2. SP200 PV Pump Controller automatically detects the ambient temperature. When the temperature is too high, the controller will reduce the output power to maintain running as far as possible; When the controller temperature is cooled to a safe level, return to full power output.
3. SP200 PV Pump Controller integrate improved MPPT algorithm, variable step size in real time tracking the MPP. Compared to a conventional constant-voltage control (CVT) method, it is more precise in tracking, response speed is much quicker, and overcomes the shortage of conventional disturbances tracking method near the MPP wide fluctuated running.
4. When SP200 PV Pump Controller fails, the panel LED will display fault types, automaticly reset regular failure, and enter into sleep and wake status according to the degree of light to ensure the controller run automatically the whole day.

## Naming Rules

Field	Mark	Content
controller series	①	Solar water pump controller
Series number	②	Series second generation
Voltage Level	③	2: Three-phase 220V 4: Three-phase 380V
voltage range	④	S: Rated voltage 310VDC, Recommended voltage range (MTTP) 180VDC~360VDC T: Rated voltage 540VDC, Recommended voltage range (MTTP) 500VDC~600VDC
Pump rated power	⑤	2.2: 2.2KW
